

OJT WEEKLY PROGRESS REPORT

Name of Student Trainee:

Renacia

Junard Paul

Pinca

Family Name

Given Name

Middle Name

Host Training Establishment:

Lhoopa Inc.

Training Period Covered:

Feb. 16, 2026

To

Feb. 20, 2026

Department Assigned:

Information Technology

Week # :

Week 1

Date	Duties	Problem Encountered	Remarks
Feb. 16, 2025	- Orientation - Getting to know the employees on different departments - Knowing my responsibilities in the Company	Understanding all the processes at Lhoopa, particularly the existing systems, can be overwhelming due to the volume of information that needs to be retained.	I will try to understand and familiarize every processes Lhoopa has one at time
Feb. 17, 2025	Holiday		
Feb. 18, 2025	Testing some of the Modules in the Cornerstone Website	Becoming familiar with the website and its processes requires time and adjustment. The workflow can be slightly confusing and overwhelming	Since it is new to me, I actively ask questions to the ITs in the office. I will make sure to become familiar with the processes of every module assigned to me.
Feb. 19, 2025	Testing some of the modules in the Cornerstone Website	Testing and understanding certain website features, particularly modules with map functionalities, can be challenging to those who have not previously worked with similar features.	I skipped this part, but I will try to understand how this feature works and how to test that
Feb. 20, 2025	Testing some of the modules in the Cornerstone and Datamind Website	Managing and learning multiple websites at the same time can be complex. The Datamind website, in particular, appears more complicated compared to Cornerstone, requiring additional time to fully understand the processes of both platforms.	I actively asked some of the ITs a question to avoid confusion and minimize mistakes during testing.
